The World's Water Volume 8: The Biennial Report On Freshwater Resources

Synopsis

Produced biennially, *The World's Water* is the most comprehensive and up-to-date source of information and analysis on freshwater resources. Each new volume examines critical global trends and offers the best data available on a variety of topics related to water. Volume 8 features chapters on hydraulic fracturing (fracking), water footprints, sustainable water jobs, and desalination financing, among other timely issues. Water briefs provide concise updates on topics including the Dead-Sea and the role of water in the Syrian conflict. *The World's Water* is coauthored by MacArthur "genius" Peter H. Gleick and his colleagues at the world-renowned Pacific Institute. Since the first volume was published in 1998, the series has become an indispensable resource for professionals in government agencies and nongovernmental organizations, researchers, students, and anyone concerned with water and its use.

Customer Reviews

Dr. Gleick, founder of CA's Pacific Institute, is a brilliant and devoted scientist who has dedicated his life to the study of water. One of the Institute's major contributions continues to be the highly regarded *Water and Conflict Chronology*, which traces the history of water as a tool of war and conflict, explores the nature of those conflicts, and provides citations and data in an interactive system, set of maps, and database. I highly recommend readers go the Pacific Institute website at www.pacinst.org for reams of free publications and resources in addition to these other books

Well informed data, and introspect on this issue. :)

book for a friend they enjoyed it for their class

Excellent!

It seems an utter violation of humanity and or Earth that this book is only available as paper product that consumes an enormous amount of water, and is not available on Kindle.
