The Hunters: A Presidential Agent Novel (Presidential Agent Series)

Synopsis

The first two novels in W. E. B. Griffin's exciting new Presidential Agent series, *By Order of the President* and *The Hostage*, immediately raced up the bestseller lists. Told in a punchy prose that connects like a right hook • (Chicago Tribune), they were further proof that "Griffin just keeps on getting better" • (Booklist). *The Hunters* picks up right where *The Hostage* left off. Two brutal murders and millions of missing dollars in the growing UN/Iraq oil-for-food scandal have led Castillo and his team to an estancia in Uruguay, where the man they seek is murdered right before their eyes. Who is responsible? Most likely, the people higher up in the dirty-money chain - those willing to risk anything to keep their secrets from being revealed. They've left just enough of a trail, though, for Castillo to pick up the scent, and with carte blanche from the President of the United States to follow it wherever it takes him, he ends up well, not exactly where he expected |

This is the 3rd book in the Griffin series that centers around Homeland Security. The only problem with this new WEB Griffin book is that I could not put it down. AT 2:30AM, I finally had to stop for sleep, even though I was only a little more than half done. Mr. Griffin's new book is full speed ahead, from beginning to end, continuing where *The Hostage* finished, but it seems to move at an even faster pace, which I enjoy. Carlos Castillo continues to build his team with the best people he can find, from the various intelligence agencies, as well as the military. I love this aspect of his books, because it is so much like true life, where people progress in their careers, or die, and new

people join the team. The hunt for the bad guys crosses many international boundaries, proving that today's intelligence operatives need to be multi-lingual and very intelligent. An agent who only speaks English is no longer an effective agent against international terrorists. Hungarian, Russian, German, Spanish and English were the languages of choice for most of this operation. You have to read to the end, to find out who all the good guys and bad guys really are. Carlos Castillo and his growing band of experts move from country to country, progressing through firefights that reveal bad guys at the highest levels. As with any Griffin book, the winners are the people who have both the intelligence to analyze complex data, and the strength of character to act on it.

With more than 35 novels published, W. E. B. Griffin presents THE HUNTERS, the third installment in his Presidential Agent series. Griffin's protagonist is Charley Castillo --- tough, skilled in Special Operations methods and answerable only to the President of the United States. The story takes place in the summer of 2005, in locations from Europe to South America and the United States. Post-9/11, the Office of Homeland Security is in place. The Director of National Intelligence, Ambassador Charles W. Montvale, resents Castillo's presidential appointment as Chief Officer of Organizational Analysis. Montvale would rather supervise Castillo but accepts the President's wishes for the time being. Amidst subtle reminders that Montvale requires constant updates on his progress, Castillo steams ahead with his task. The action begins at Estancia Shangri-La in the Republic of Uruguay. Castillo and his small band arrive at the sprawling "big house" in time to find target Jean-Paul Bertrand, holder of a Lebanese passport. Bertrand's real identification is that of Jean-Paul Lorimer, who is suspected of heavy involvement in the oil-for-food scandal. Bertrand's sister had been kidnapped and drugged, and her husband was murdered before her eyes in order to drive home the serious intent of her tormenters. Castillo's mission is to determine the true identity of Bertrand and bring him back to the United States. By the time Castillo's group enters the man's office, they are under fire from unknown assailants. Bertrand has been murdered, and their Special Ops training kicks into place. Castillo's men return fire with deadly accuracy, killing all six unknown, dark-clothed, masked assassins. Before exiting, one of their own is dead, garroted by an unidentified individual.
